

## EKC Pulling fittings

### Protection mode:

Type of protection: II 2 G - EEx d IIB  
 Class of temperature: T6

### Description:

The EKC fittings consist of a body having two threaded entries and of a cover, with flat joint, fixed by screws.

The EKC fittings are used to facilitate the insertion of not very flexible cables or of big sections and to connect pipes.

### Technicals data:

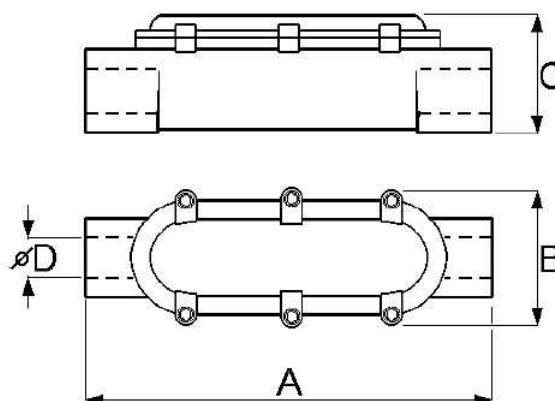

#### Materials:

Body and cover: aluminium alloy.  
 Screws: galvanized steel.

#### On request:

Other types of thread.
